L-Lysine
1000mg

**For herpes virus
and shingles**

L-LYSINE is an essential amino acid. It is required for tissue repair and growth. It is believed to be a natural help for shingles. Shingles is a painful condition due to the reactivation of the varicella zoster virus. It appears to help treat the symptoms of shingles.

L-LYSINE inhibits the herpes virus and is therefore of help in reducing and inhibiting the severity of cold sores. It is also of help with type 2 herpes, which manifests itself around the genital area. Pregnant women should always consult with their doctor before taking any supplement.

STORAGE: Store at or below 25°C.
Keep out of reach of children.

STOOR: Bewaar teen of onder 25°C.
Hou buite bereik van kinders.
